

Webmaster Report – January 2024

Over the past couple of months there have been some cosmetic and layout changes to the website such as the news articles conservation projects design. This is part of an ongoing process to keep the site fresh and up to current standards.

The menus have also been adjusted to better communicate the changes to some content. "About" has now become "Resources" with a simplified resources "home" page clearly listing what functions and services CNCC offer and should better describe further additions in the future. Similarly, the "Fixed Aids" section has become "Equipment" with a view to adding other sections soon.

As agreed at the last meeting, the new Exploration Grants page has been added to the Resources section including a description and online application form.

The usual Christmas logo and banner was applied on the site and across social media.
